

## USER STORIES

1. As a user, I want to add products so that I can track the percentage of alcohol present in the product I consume as well as the date and the time when I consumed a product.
2. As a user, I want to register safely and with ease, so that I am assured that all my information is safe and I can easily log in again.
3. As a user, I want to have a Search button so that I can search for items that I have already entered so that I do not have to add them as a new item again.
4. As a user, I want to track my daily consumption so that I know how much I consume daily.
5. As a user, I want to login securely so that my data is safe as well as I can access it without any problem.

## USER STORIES- ACCEPTANCE TESTS

1.1 Products should be displayed with numbers such as 1,2,3... Once a product is added the date,time and percentage of alcohol in that product should be displayed.

2.1 Password should have alphanumeric and special characters. To make register feature faster, provide user with options like Google or Facebook registration (Proper validations should be present / Send activation link to user's email & validate).

3.1 While searching the product in the app, if the product is not found, the user should be notified by a notification

4.1 There should have a page which contain substance added that day so that user can track their daily intake and know how much they consumed on that day.

5.1 Password and wrong user-id/password valid messages should be given to the user (Like: The user is not registered/password is wrong)
